"Eyelid surgery results are better than ever with my new minimally invasive techniques," Dr. Schlessinger said.

In addition to surgical solutions, non-surgical rejuvenation of the eyelids with injectable fillers such as Restylane and Juvederm produce positive results, as well, he said. "Laser and light therapies also offer great results with minimal

down-time."

Dr. Schlessinger is board certified by the American Academy of Ophthalmology. He received his medical degree from the University of Pittsburgh School of Medicine. He completed his Fellowship training at the University of Minnesota in

eyelid plastic surgery and neuro-ophthalmology.

In addition to being the director of his private practice, Dr. Schlessinger teaches eyelid plastic surgery to ophthalmology residents on Long Island and in NYC. Dr. Schlessinger has been awarded the "Outstanding Clinician of the Year" award.

Dr. Schlessinger is also director of oculoplastic surgery at Nassau University Medical Center. In addition to teaching the residents, he is called upon to see the most challenging and difficult eyelid surgery cases. He performs reconstructive surgery for both trauma and cancer cases. Prior to that, Dr. Schlessinger was the medical director of ophthalmic plastic surgery at Brooklyn Jewish Hospital.

Among the specialized, state-of-the-art services available at the practice are blepharoplasty; Threadlifts; Botox Cosmetic; laser skin resurfacing; Browlift; mid facelift; chemical peels; wrinkle fillers; IPL facial rejuvenation; skin care products as well as aesthetician services.
