

# Cosmetic Surgery SOLUTIONS

## Choose a specialist for eyelid surgery

**Y**ears ago we expected our family doctor to do everything from treating colds to delivering babies. As medicine advances, patients have become aware of the necessity to obtain a specialist to pinpoint their specific medical needs. This also holds true for cosmetic surgery. The doctor highly proficient at liposuction may not be the best choice for eyelid surgery.

With more than 15 years of experience, Dr. Schlessinger is the surgeon other doctors choose for their eyelid surgery. Dr. Schlessinger is a Board Certified ophthalmologist with Fellowship training in Eyelid and Facial Plastic Surgery.

Recognized as a premier eyelid and facial plastic surgeon, Dr. Schlessinger performs both cosmetic and reconstructive

eyelid surgery. "Unfortunately, complications are an inherent risk with any surgery" Dr. Schlessinger tells us. "As an Ophthalmic Plastic Surgeon, I am often asked by other surgeons to repair complex eyelid problems that may have occurred during a previous procedure."

The wife of a local Ophthalmologist tells us "My husband has seen the results of dozens of plastic surgeons in the area. When it came time for my eyelid surgery, we chose Dr. Schlessinger. I am thrilled with the results."

Dr. Schlessinger has offices in Nassau and Suffolk. For a complimentary consultation, call 516-496-2122 or go to [www.schlessingereyeface.com](http://www.schlessingereyeface.com).
