

This fall...  
be sensationally subtle.

sculptra<sup>®</sup>aesthetic | anti-age for the modern age  
injectable poly-L-lactic acid

Not an actual patient.

Are you looking for a different way to anti-age that won't give you away?

Then it may be time to consider **Sculptra<sup>®</sup>Aesthetic**.

That's because SculptraAesthetic is the first facial injectable that works gradually to give you **natural-looking, yet noticeable results that can last for up to 2 years**. Of course, individual results may vary.

### The subtle before-to-after transformation

Before treatment    After 2 treatments    After 3 treatments    After 25 months

*(all photos unretouched)  
Individual results and treatment regimens may vary.*

#### Treatment Considerations:

- SculptraAesthetic is not for use in the lips.
- SculptraAesthetic is not recommended for use around the eyes.
- Safety and effectiveness of SculptraAesthetic has not been evaluated in areas other than nasolabial wrinkles (smile lines) and folds in clinical trials.

#### Intended Use / Indications

Sculptra Aesthetic is intended for use in people with healthy immune systems as one-time treatment regimen of up to 4 injection sessions that are scheduled about 3 weeks apart for correction of shallow to deep nasolabial fold contour deficiencies and other facial wrinkles in which deep dermal grid pattern (cross-hatch) injection technique is appropriate. Sculptra Aesthetic may provide cosmetic correction of facial wrinkles with a Wrinkle Assessment Score of 2, 3, or 4 as shown in the photos in Figure 2 of the full Prescribing Information.

With an average of 3 treatments over the course of a few months, you, too, could be on your way to natural-looking results that can last up to 2 years. Individual results and treatment regimens may vary.

So give yourself a wonderful gift this fall and call my office for an appointment today. I look forward to meeting with you and discussing all the ways SculptraAesthetic can produce a natural, younger-looking appearance.

#### Important Safety Information for Sculptra Aesthetic

You should not use Sculptra Aesthetic if you are allergic to any ingredient of the product or have a history of keloid formation or hypertrophic scarring. Sculptra Aesthetic should not be injected while you have an active skin infection or inflammation in the treatment area and should not be injected into the red area of the lip. Use in the skin near the eyes is not recommended.

Side effects of Sculptra Aesthetic may include injection site discomfort, redness, bruising, bleeding, itching, and swelling. Other side effects may include small lumps under the skin that are sometimes noticeable when pressing on the treated area. Larger lumps, some with delayed onset with or without inflammation or skin discoloration, have also been reported. In a key clinical study the numbers of small and larger lumps were low and most resolved without treatment.

#### Intended Use / Indications

Sculptra Aesthetic is intended for use in people with healthy immune systems as one-time treatment regimen of up to 4 injection sessions that are scheduled about 3 weeks apart for correction of shallow to deep nasolabial fold contour deficiencies and other facial wrinkles in which deep dermal grid pattern (cross-hatch) injection technique is appropriate. Sculptra Aesthetic may provide cosmetic correction of facial wrinkles with a Wrinkle Assessment Score of 2, 3, or 4 as shown in the photos in Figure 2 of the full Prescribing Information.
