

SEF Signature Facial

Customizable to any skin type, our SEF Signature Facial is a great way to introduce your skin to a facial treatment. The procedure includes cleansing, exfoliation, and mild extractions to address skin texture and pores, followed by the ultimate hydration and rejuvenation of the skin with our exclusive mask and potent professional-grade serums.

SEF Detox Facial

Our Detoxifying Facial is designed to deeply exfoliate and pull impurities from the pores. This purifying facial with essential extractions, a high frequency treatment, and a custom mask, alleviates the overproduction of sebum, removes toxins and excess oil, and oxygenates your skin.

Fire and Ice Facial

Also known as the *Red-Carpet Facial*, our Fire and Ice Facial is designed to rapidly and safely resurface the skin. Utilizing the combination of warming and cooling masks, this facial treatment smooths, softens, and hydrates while stimulating cellular renewal for healthier, younger-looking, glowing skin.

Foaming Enzyme Facial

Enjoy the powerful, yet soothing, Foaming Enzyme Treatment Facial that features active foaming agents that are gently massaged into the skin for light and effective exfoliation. This professional treatment combines papaya and pineapple enzymes with a potent, botanically derived Glycolic Acid to reveal a polished, more radiant complexion.

Honey Facial

This luxurious, exfoliating, and hydrating facial enhances skin with gentle massage and soothing hydration. Enjoy the warming sensation of the honey and enzymes as they boost circulation and gently resurfacing the skin. The Honey Facial is completed with a deeply hydrating masque to nourish the skin and leave it feeling rejuvenated.

Skinwave

The Skinwave Facial is a unique hydrating facial that infuses the skin with antioxidant-rich ingredients and hydrogen-treated water to reach new levels of detoxification and hydration. Skinwave solutions formulated with AHA / BHA, hyaluronic acid, and hydrogen are infused into the skin while the proprietary water-delivery extraction system works to remove impurities. This revolutionary approach provides the benefits of refined skin texture, diminished blemishes, and improved appearance of fine lines and wrinkles.

Dermaplaning Facial

A Dermaplane Facial is a physical exfoliation method that involves using a sharp blade to gently scrape away the top layer of dead skin cells revealing a brighter, smoother complexion. This is a favorite treatment in the entertainment industry as it removes all dead skin cells and facial hair, leaving the surface smooth and camera-ready! The treatment includes professional dermaplaning, light facial massage, and is concluded by our exclusive mask and potent professional-grade serums.

Dermaplaning Only

Dermaplaning can be performed as a stand-alone treatment for exfoliation of dead skin cells and peach fuzz, leaving the surface of the skin soft and smooth. It allows for a beautiful application of makeup afterwards, which is why celebrities obsess over this treatment. After dermaplaning we apply a hydrating serum, moisturizing lotion, and sunscreen.

Chemical Peel

A chemical peel is a topical application of beneficial acids to treat various skin conditions such as acne, age spots, blotchy complexion, uneven skin tone, dull complexion, fine lines, melasma, and sun-damage skin. Chemical peels range from superficial, to mid-depth, to deep. Whether you receive a chemical peel to diminish signs of aging or treat a skin condition, you can see fewer lines and wrinkles, more even skin tone, brighter complexion, smoother skin and reduction of acne and scarring.

Superficial Peel (AHA, BHA), VI Peel Original, VI Peel Advanced, VI Peel Precision Plus, VI Peel Purify, Jessner Peel

SKINPEN Microneedling

Microneedling, also known as *Collagen Induction Therapy*, is utilized to generate new collagen by creating microscopic injuries in the surface of the skin. Our practice offers the SkinPen® microneedling pen, a superior, FDA cleared microneedling device. This powerful treatment reduces the appearance of fine lines and wrinkles, improves acne scars, restores lost volume, and improves the overall texture, firmness, and thickness of the skin.

SKINPEN Microneedling with PRP

Also known as a “vampire facial”, microneedling with the addition of Platelet-Rich Plasma (PRP) takes your microneedling result to the next level. This treatment utilizes your own blood’s growth factors and other beneficial healing cells to improve the skin’s tone, texture, acne scars, pigmentation, and other signs of damage and aging.

AquaGold Facial

Aquagold is a microinjection device that contains twenty, 24 karat gold needles, each of which is smaller than a hair follicle, for a virtually painless treatment. Through these tiny needles, this device delivers a customized cocktail of serums directly into the skin. Infusing anti-aging products under the skin allows them to be absorbed more effectively and with a greater duration of efficacy.

Clear+Brilliant Laser Treatment

Clear+Brilliant is a gentle fractional laser that addresses and helps prevent early signs of aging. This non-invasive procedure improves skin tone, smooths texture, and refreshes your skin from the inside out. Clear+Brilliant revitalizes skin and brings back a natural, radiant glow without the downtime of more invasive treatments.

Dynamic Duo (Clear+Brilliant with SKINPEN Microneedling)

The powerful duo of 2 modalities in one treatment; Clear + Brilliant Laser followed by SKINPEN Microneedling. This advanced combination treatment improves fine lines and wrinkles, hyperpigmentation, acne, skin texture and pore size.

Morpheus8 RF

Morpheus8 combines microneedling with radiofrequency technology for fractional skin resurfacing and the deep stimulation of collagen production. Harvesting the power of both technologies, this treatment delivers optimal skin tightening, rejuvenation, and improvement in skin texture.

Ultherapy

Ultherapy is an incredible rejuvenation procedure that lifts, tightens and improves looseness or laxity of the skin by using safe, time-tested ultrasound energy. This non-invasive treatment deposits focused ultrasound energy deep beneath the skin at the optimal temperature for collagen regeneration with little to no downtime.

Photo-facial / IPL

Using the power of broadband light energy, Intense Pulsed Light (IPL) reduces the signs of age spots, discoloration/pigmentation, redness/rosacea, and telangiectasia/vasculature in the skin.

Vascular Laser Treatment

Our long pulsed Yag laser is designed to precisely treat visible vascular lesions, broken capillaries, telangiectasias, spider veins, and leg veins. Once the laser light is applied to the skin, it enters the vein where the energy from the laser is absorbed causing the vein walls to collapse and seal shut, eliminating the vein's appearance on the skin.

Erbium: YAG Resurfacing Laser

Erbium-YAG is a superficial laser that is used for the treatment of acne scarring, fine lines and wrinkles, skin texture, and hyperpigmentation. Our Erbium:YAG laser is capable of achieving superior resurfacing results, with reduced discomfort, shorter healing time, reduced erythema, and less risk of pigmentation. In addition, the ablative Erbium:YAG laser resurfacing stimulates collagen reorganization and fibroblast activation in photoaged skin.

Laser Hair Reduction

Diode lasers for hair removal are highly effective for terminal hair reduction and are safe for all skin types, including darker skin, due to their longer wavelength and deeper penetration. Diode lasers use a single wavelength of light that heats up the melanin and destroys the root and blood flow to the follicle disabling hair growth. Multiple treatments are required 4-6 weeks apart.

Add-ons:

Dermaplaning

Collagen Mask: choice of face, neck, décolleté

Eye Collagen Mask

LED Light

Extractions

Exosomes (microneedling, Morpheus8, Clear+Brilliant, Dynamic Duo)

Bio-Cellulose Mask (microneedling, Morpheus8, Clear+Brilliant, Dynamic Duo)

In addition to our spa services, various injectable treatments are available upon request (Neurotoxins, Dermal Fillers, Skin Boosters, etc.).
